

Parents are cordially invited to our next exclusive webinar on **The Human Skills That Will Shape Tomorrow's Graduates: Preparing Students for a World AI Cannot Fully Navigate.**

As artificial intelligence reshapes industries, transforms the nature of work and challenges traditional ideas about professional skills, an important question emerges: what will distinguish the graduates of tomorrow?

Technical proficiency and digital fluency will undoubtedly matter. But so will the ability to think critically, interpret complex information, understand different perspectives, communicate effectively and make considered decisions in an increasingly interconnected world.

A humanities education develops precisely these intellectual and human capabilities. Through disciplines such as History, Economics, Geography, Literature, Psychology and the Social Sciences, students learn to question, investigate, debate, analyse and understand the world beyond their immediate experience.

At NPS International School, these perspectives are developed through a broad academic curriculum and opportunities for meaningful intellectual engagement, from Socratic seminars and literary festivals to Economics and Business Summits and student-led conferences.

Join **Ms Sushmita Chatterjee, Deputy Principal, Academics**, alongside NPSI alumni pursuing their academic and professional journeys in the humanities, for a conversation exploring:

- The enduring value of humanities education in an AI-driven world.
- The intellectual and interpersonal capabilities developed through humanities disciplines.
- How critical thinking, ethical reasoning, cultural literacy and global perspectives shape future opportunities.
- The relationship between humanities education, higher education and evolving career pathways.
- How schools can prepare students to navigate complexity, make informed decisions and contribute meaningfully to society.

Date: Wednesday, 2 December 2026
Time: 4:00–5:00 PM (Singapore Time)
Speaker: Ms Sushmita Chatterjee, Deputy Principal, Academics

An opportunity for parents and students to reconsider what it means to be future-ready.
